**g) Electrical Energy Mandatory Form**

By the EXHIBITOR'S completion and payment of the Form for Utilization of Electrical Energy, the EXECUTIVE BOARD will install an electrical outlet for supplying of electricity at the EXHIBITOR'S stand, at the location that is the most convenient for the EXECUTIVE BOARD.

Any and all electrical installations shall be accompanied by a project executed by a qualified professional and in compliance with the technical standards established by the ABNT (Brazilian Association of Technical Standards) and ELETROPAULO. It will be the EXHIBITOR'S responsibility to provide the circuit board containing neutral three-phase extension equipped with a main switch and the appropriate circuit breakers and to complement the installation for distribution of power (wiring) at his stand from the source outlet installed.

Any metallic structure that is part of the project for the stand shall be duly grounded according with NBR 5410, in accordance with the standards of the ABNT. No electrical devices, pendants or external fastening may be installed without prior authorization by the EXECUTIVE BOARD.

**FOR GREATER SAFETY OF THE PUBLIC, THE STAND'S INSTALLATIONS (AIR CONDITIONING, LIGHTING, EQUIPMENT, WIRES AND POWER CABLES) MUST NOT BE LEFT VISIBLE TO NEIGHBORING STANDS OR TO VISITORS.**

**WE REQUEST THAT CHANNELS FOR POWER CABLES BE EQUIPPED WITH REMOVABLE COVERS STARTING FROM THE CHANNEL OF THE PAVILION TO THE STAND'S SWITCHBOARD AS WELL AS THE INSTALLATIONS FOR WATER (PLUMBING).**

**The stand's main power switch shall be located where it is readily accessible to the Executive Board's security service personnel.**

**If a power closet/booth is installed at the stand, the EXECUTIVE BOARD shall receive a copy of the key that affords access to it.**

**The current available is alternating current, with a frequency of 60 cycles/s (60Hz) at voltages of 110 / 127 V single-phase and 220/240V two-phase or three-phase. The cost is per kW.**

The EXECUTIVE BOARD recommends that each stand have electrical protection equipment (voltage stabilizer, automatic switches, etc.) against possible oscillations in power or lack of phases, with such equipment being located in a place that provides freedom/ease of access.

To calculate the number of kW required for their stand, EXHIBITORS should simply add the number of W and kW indicated on the tags of their equipment and on the lamps that will be used in lighting their stands. There is no need to consider the kW/hour since the cost of the kW refers to the consumption throughout the entire EVENT Execution period.

In order to facilitate calculation, we have included a table at the end of this MANUAL with the number of kW consumed by the items (appliances) most commonly used at a stand. Any excess in consumption that is found during the opening dates of the EVENT will be charged by the EXECUTIVE BOARD at a specified rate **WITH A SURCHARGE OF 25% AS A PENALTY.**

The use of any type of lighting that, in view of its automatic switches, is capable of causing interference to electrical or electronic devices on display at other stands will not be allowed.

**After the closing of the EVENT for the day, the electrical power is automatically shut down. Therefore, if there are any devices, machines or products at the stand that require a continuous supply of electricity until they are withdrawn from the PAVILION, we ask that advance notice be given to the CAEX (Exhibitor Assistance Center [caex@sobratema.org.br](mailto:caex@sobratema.org.br)).**

At events where the PAVILION is unable to handle the demand for electricity, we will utilize generator sets to supply the general demand and the power will be distributed with absolutely technical objectives by our Electrical Department. Therefore, electricity at your stand may be supplied by generator sets.

**h) Water Installations (Plumbing).**

By the EXHIBITOR'S completion and payment of this form, the EXECUTIVE BOARD will install a point for supplying and drainage of water at the EXHIBITOR'S stand.

The location for such installation shall be specified by the stand Assembler hired by the EXHIBITOR upon entering the PAVILION for assembly of the stand via the Executive Board's Dept. of Operations.

The installation will consist of a water supply outlet (source) of ¾ of an inch with a valve, and a 1-inch drain, the cost of which will be per supply outlet requested.

**WE DO NOT INSTALL WATER OUTLETS ON MEZZANINES OR ON THE 2ND FLOOR.**

It will be the EXHIBITOR'S responsibility to complete the installation for distribution of water at his stand according to the technical standards established by the ABNT and SABESP from the source outlet installed by the EXECUTIVE BOARD.

**THE WATER OUTLET (SOURCE) MUST NOT BE INSTALLED NEAR THE ELECTRICAL POWER OUTLET.**

**THE EXECUTIVE BOARD WILL NOT PROVIDE SINKS. THE ASSEMBLER HIRED TO ASSEMBLE THE EXHIBITOR'S STAND SHOULD BE ASKED TO PROVIDE SUCH INSTALLATION.**

**IT IS MANDATORY THAT EVERY EXHIBITOR REQUEST, VIA THE USE OF THIS FORM, THAT A DRAIN BE INSTALLED EXCLUSIVELY FOR AIR CONDITIONING, FOR EVERY INDIVIDUAL AIR CONDITIONER THAT IS INSTALLED AT HIS STAND, FOR THE DRAINAGE OF CONDENSATION CAUSED BY SUCH AIR CONDITIONING.**

This point for water (source) will be installed by the EXECUTIVE BOARD at the location indicated by the Assembler, upon entering the PAVILION for assembly of the stand, by the Department of Operations of the EXECUTIVE BOARD.

There is no need to request one water outlet for each fixture since the EXHIBITOR can assemble his plumbing network as of this one point, connecting the various air conditioner drains to a clear ½ inch hose via a plastic "T" connector. Should the EXHIBITOR not want to assemble a plumbing distribution network, then he shall request a specific point for each air-conditioner (each appliance).

**ATTENTION:**  
**Water installations (plumbing) require previous assessment of requirement/extension so as to afford efficient and appropriate distribution and the utilization of the necessary equipment and components. Therefore, the EXECUTIVE BOARD will not authorize the installation of this service if the form is submitted after the established deadline. REQUESTS THAT ARE NOT MADE BY THE DEADLINE WILL BE SUBJECT TO THE EXISTENCE OF TECHNICAL POSSIBILITIES FOR HANDLING THEM.**

When the EXHIBITOR will use the water outlet and drain in the demonstration of Equipment, a fee will be charged regarding the consumption of water. In the case of such installation, Form No. 9 should be completed according to the option desired.

**i) City Hall Fees**

In conformity with Laws 13474 and 13477 of December 30, 2002, the EXECUTIVE BOARD has been assigned the duty of collecting and paying the applicable municipal fees/taxes to the PMSP (São Paulo City Hall). To comply with this determination, we hereby inform that the procedures and locale for such payment will be available at the website of the EVENT, on the "Exhibitors-Only" restricted access page, with the respective values of those fees/taxes (TFE - Establishment Premises Inspection, TFA - Advertisement Inspection and TFA - Brochure/Flyer Inspection).

**j) Supplying of Compressed Air**

At the exhibitor's request, the EXECUTIVE BOARD may install at his stand an outlet for Compressed Air along the channel/gutter, with a ¾ inch outlet nozzle and output pressure of 7 kg/cm2 equivalent to 100 pounds per square inch (100 psi) of WINGFOOT type or similar. **For an estimate of cost**, the EXHIBITOR should submit a request via email to [caex@sobratema.org.br](mailto:caex@sobratema.org.br) stating the flow rate (consumption) for the quantity he requires in cubic feet per minute (cfm) and, after receiving an estimate of cost, authorize the installation of same for the period of the EVENT.

**SHOULD THE EXHIBITOR NOT APPROVE THE ESTIMATE, THE EXHIBITOR MUST FORMALLY WITHDRAW HIS REQUEST IN WRITING WITHIN 48 HOURS OF HAVING RECEIVED THE ESTIMATE IN ORDER TO AVOID BEING CHARGED FOR THE COST OF INSTALLING THE COMPRESSED AIR OUTLET.**

To enable testing of the EXHIBITOR'S product, the Compressed Air line will be activated on the eve of the inauguration of the EVENT, from 2:00 p.m. to 6:00 p.m., and will go back into operation during the scheduled period and official opening times of the EVENT.

The EXHIBITOR shall complete the installation of Compressed Air with a suitable filter equipped with a pressure regulator to meet his needs since the EXECUTIVE BOARD will not be held responsible for impurities or moisture in the air supply.

Should the EXHIBITOR choose to bring his own compressor, the EXHIBITOR shall provide installations that do not pose and completely eliminate any risk to people, goods and parts of exhibition stands, and shall prevent noise or vibration that disrupt the operations in adjacent stands.

The EXECUTIVE BOARD reserves the right to discontinue operation of the EXHIBITOR'S device (compressor) if such requirements are not complied with.

**ATTENTION:**  
**THE SUPPLY OF COMPRESSED AIR MAY ONLY BE USED TO POWER MACHINES AND ITS USE IN EQUIPMENT WHOSE PURPOSE IS DECORATION IS PROHIBITED.**

It is the duty of the exhibiting companies, as well as of their outsourced/hired third parties to comply with NR-15 as regards 'Limits for Tolerance of Continuous or Intermittent Noise'.

## 3. HIRING OF ASSEMBLER
